COMICCRAFT

Phase 1 - Brainstorming & Ideation

ComicCraft is a project designed to help users create comics in a simple and organized way.

The main idea is to provide a system where a user can enter a story or concept and generate a comic-style output. The project focuses on simplifying comic creation and combining story, characters, scenes, and visual presentation in one workflow.

Objectives:
• Create an easy-to-use comic creation system.
• Convert a story idea into comic content.
• Organize characters, scenes, and dialogue.
• Provide a clear workflow from input to final comic.
• Reduce the effort required to create a basic comic.
