COMICCRAFT

Phase 2 - Requirement Analysis

Functional requirements:

- User should be able to provide story or comic input.
- The system should process the provided information.
- Characters and scenes should be organized.
- The system should generate comic-related output.
- The generated result should be viewable by the user.

Non-functional requirements:

- Simple user interface.
- Reliable processing.
- Easy navigation.
- Maintainable project structure.
- Reasonable response time.

Software requirements include Python, Flask and the required project libraries. Hardware requirements include a computer with sufficient storage and memory to run the application.
